Indicators Used

INDICATOR	DESCRIPTION AND HOW IT WAS CALCULATED
Retention Rate	One-year retention rates were calculated by following a group of entering students in a given fiscal year (FY) and seeing who was still active at the start of the next FY. Percentages based on small numbers of students may explain the variation over time.
Graduation Rate	Graduation rates are calculated by taking the number of students who graduated divided by the total number of students who started in that FY. Time to completion is calculated using 150% of a standard graduation time. Therefore, it is 6 years for bachelor seeking students and 3 years for master degree seeking students. The most recent graduation rate that we can provide is FY12 for the bachelor students and FY15 for master students.
